

What is claim d is:

1. A compound sound generator for an information equipment comprising:

a case of the equipment;

5 a frame set in the case;

a speaker and receiver provided in the frame, the speaker having a first diaphragm and the receiver having a second diaphragm;

10 a first back chamber behind the first diaphragm of the speaker and a second back chamber behind the second diaphragm of the receiver; and

a baffle formed integrally with the frame so as to separate the first and second back chambers from each other.

2. The compound sound generator according to claim 15 1 wherein the baffle is provided to surround an outside of the second diaphragm of the receiver, and to form an annular space to communicate with the second back chamber of the receiver.

3. The compound sound generator according to claim 20 2 wherein the first back chamber of the speaker is opened to a space between the outside wall of the baffle and the inside wall of the case.

4. The compound sound generator according to claim 2 wherein at least one of the first back chamber of the speaker 25 and the second back chamber of the receiver is opened to the outside of the case at a position different from other openings.
